

Investment Quarterly

Q2 2024

For financial professionals only

Important notes

Performance data

All Risk Grade performance figures are from FE Analytics, and assume:

- net income has been reinvested (“total return basis”)
- investment has been made throughout the period **1st April 2024 to 30th June 2024**.
- investment has been made on a “bid to bid basis”.
- there are no Initial Charges or Fund One-Off Costs on any funds.

Performance figures **include**:

- Fund Ongoing Charges Figure, Fund Trading Costs and Fund Incidental Costs.

Performance figures **don't include**:

- Discretionary Management Charge, Dealing Charge, Custody Charge, Parmenion SIPP Charge or Adviser Charges.

This means figures should be close to the Gross Performance figures in the quarterly valuation reports, providing the client has been invested in the same model throughout the period.

Performance figures assume fund sales and purchases for rebalancing, and fund switches are made on the same day. In reality, at least a 24-hour delay could be imposed between sales and purchases, to make sure we've received the sale proceeds first.

This protects the pooled client money account by making sure only money belonging to clients is used to fund their purchases.

Where no performance data is available due to the inception date of the fund, N/A is quoted.

Fund manager focus & 3rd party asset allocation solutions

Vanguard LifeStrategies, Dimensional Core Wealth and Core Wealth Plus, and Morningstar Active and Passive aren't mapped to our risk framework. They are displayed on the nearest fit risk grade for convenience, this shouldn't be considered an official mapping.

Important information

The tables in this document provide past performance data and should not be taken as a guide to future returns.

The value of investments and the income that can be earned from them may go down as well as up and a client may not get back the full amount invested.

Rates and bases of taxation are subject to change. The risks of investment associated with different asset classes, for example, overseas equity, property, corporate debt, commodities, and alternative assets vary in their nature.

Yield

The Investment Quarterly quotes the historic yield, reflecting distributions declared over the past twelve months as a percentage of the unit price. It's based on a portfolio snapshot on that day.

IQ in Detail

Cumulative performance for each solution is shown over various time periods.

Volatility (measured as standard deviation) for each solution is also shown over various time periods.

In IQ we break down:

- Volatility
- Performance
- Charges
- Yield

For each solution at each risk grade. We also include the IA sector benchmark for comparison.

Some 3rd Party Asset Allocation and Fund Manager Focus solutions aren't mapped to our risk framework but are displayed on the nearest fit risk grade for convenience. For more information see **Important notes** on page 2.

The risk grade's IA benchmark is included for comparison.

Charges and yield are included. Though bear in mind that OCFs can vary day to day, so this is a snapshot in time.

Portfolio changes

Affected solutions	Change	Manager Comments
Strategic Ethical Active A Strategic Ethical Active B Strategic Ethical Active C	Annual Strategic Asset Allocation Amendments	<p>The annual review of our Strategic Asset Allocation has led to several changes.</p> <p>To increase diversification and capture attractive long term valuation opportunities, we have introduced a new Global Smaller Companies asset class from the middle risk grades and upwards. As such we've introduced the Montanaro Better World fund to the portfolio and dialled down exposure to Asia Pacific ex Japan equity and emerging markets. While we remain positive on the long-term prospects for these markets, these changes help to improve the balance in the higher risk grades.</p>
Tactical Income	Tactical Asset Allocation Amendments	<p>The Tactical committee met and decided that the underweight to UK equity should be closed, as the unloved and under-owned nature of the market has led to valuation attractiveness.</p> <p>This allocation was funded by reducing the overweight to cash. Whilst cash has helped to provide income, it's now deemed unnecessary to be overweight and a good funding source as we get closer to rate cuts.</p>
Tactical Active Tactical Passive	Tactical Asset Allocation Amendments	<p>Several changes were made by the Tactical committee over the quarter. Japan Equity was reduced in recognition of the gains made since going overweight, and the asset class now looking a little less attractive. The proceeds were reinvested into the Europe ex UK equity asset class to reduce the underweight.</p> <p>The committee also added to UK equity as they felt the underweight was too big, particularly given the associated inflation protection. We did this via Diversified Alternatives and Global Government Bonds where there were overweights.</p>
Tactical Active Strategic Multi-Option Active XP Morningstar Active Strategic Active Strategic Multi-Option (Active) DT Multi-Option (Active)	UK Equity Alterations	<p>The changes to our UK Equity asset class were initiated by Ben Whitmore deciding to leave Jupiter later this year to set up a new fund house. His UK Special Situations fund provided the 'value' component of our UK asset class, and so we have selected a fund with this style factor, Invesco UK Opportunities, as a replacement.</p> <p>The fund offers consistent large cap value, but to a lesser degree than Jupiter. As such, we looked to rework the overall fund weights within the asset class to ensure a balanced overall blend. Furthermore, we have condensed the number of funds being used from 6 to 5. Alongside Jupiter, Lindsell Train UK Equity is being removed. In Evenlode Income we have a very similar return profile but a fund that there is collectively more conviction in.</p>
Dimensional Core Wealth Dimensional Core Plus Wealth	Various	In line with the quarterly Dimensions Core Wealth and Core Plus Wealth updates, very minor amendments were made to certain fund weightings in some of the models, with small increases to international equity funded from small reductions to UK equity.
